

Sea-Watch Technologies

Intelligent Monitoring & Alert Systems

Fact Sheet

Our Company	Sea-Watch Technologies is a systems integration company providing vessel monitoring and control for the marine industry.
Our Mission	To provide the essential products and services necessary to support realtime, web-based monitoring and alert systems for marine vessels.
Our Product	<p>The Sea-Watch Integrated System (SIS) provides realtime tracking, monitoring, and alert notification to both private boat owners and fleet managers. SIS effectively combines three separate technologies (Internet, artificial intelligence, and GPS) to give owners and fleet managers the following capabilities:</p> <p>Onboard</p> <ul style="list-style-type: none">• Systems monitoring and diagnostics• Entertainment system• Navigation <p>Remote</p> <ul style="list-style-type: none">• Systems monitoring, diagnostics, and alerts• Vessel tracking and movement alerts• Security monitoring/alerts <p>SIS ties all the various boat systems and sensors together into one expandable, affordable system. Acting as a “hub”, SIS enables seamless communications, boat monitoring, entertainment, and even a boat “black box” in the event of a catastrophe. Combining both onboard and remote monitoring and control capabilities sets SIS apart from their competitors. And the ability to receive real-time intelligent alerts <i>anywhere</i> provides a level of security and peace-of-mind not available until now.</p> <p>Sea-Watch Technologies is a privately held company with their main offices located in Melbourne, FL. The product development and engineering services firm specializes in the development of real-time applications for the marine industry.</p>
